I want to add a button in window for slideshow in JavaFx. I have not added button in scene graph. I have created scene graph. My code is given below. public static void main(String[] args) { launch(args); } @Override public void start(Stage primaryStage) throws Exception { Parent root = FXMLLoader.load(getClass().getResource("/captioned_window/window.fxml")); primaryStage.setScene(new Scene(root, 350, 400)); primaryStage.show(); } @Override public void stop() { // TODO Auto-generated method stub } } A: You can use SceneBuilder to build Scene with all your layout elements you need. This tool can be also integrated with JavaFX. For example you can download below example and open dialog with this example on SceneBuilder You can also place a button and add some action "SceneBuilder".showDialog("Place your scene here", "Button", ButtonType.OK); In your case you need to place a button and add Action on it: Button b = new Button("Add slideshows"); Action action = new Action(); Scene scene = new Scene(b,200,200); scene.getStylesheets().add(" f678ea9f9e
